

THE ORAL-SYSTEMIC FACTS ARE ...

...at least 80% of American adults have gum inflammation/disease.

...increased trigeminal nerve traffic from TMJ and poor dental bite can create central sensitization and migraines.

...gum disease is linked with blood vessel disease, heart attacks and strokes.

...poor ventilation during sleep triggers nighttime clenching & bracing to maintain the airway.

...gum disease and tooth loss increase the risk of Alzheimer's disease.

Your mouth talks to your body ...

... and your body talks to your mouth

...bad bites and poor oral-facial development increase the risk for sleep apnea.

Thermography
for Health NY

...cavities are caused by acid-loving bacteria spread during kissing & sharing food.

...if you have diabetes and bleeding gums, your risk of premature death increases as much as 700%.

...gum disease increases the risk for head & neck cancer, pancreatic, kidney and breast cancer.

...oral bacteria are being found in brain tissue, heart vessels, joints and many other parts of your body.

What Happens In Your Mouth ... Does NOT Stay In Your Mouth!
