

Nitric Oxide (NO)

The 8 Secrets to Optimal Breast Health

Nitric oxide is a powerful neurotransmitter that helps blood vessels relax and improves circulation. It acts as a vasodilator, an antioxidant, and kills bacteria in the airways. Nasal breathing produces NO and is how we're supposed to be breathing.

Video Clip:

Watch Dr. Winick and Tammy Kohlschmidt share information about NO, discuss the benefits of it, and much more in this [short video clip](#).

Neo40 & BeetElite: Nitric Oxide (NO)

Used by more than 1,500 medical professionals in their daily practice, Neo40 is clinically-shown to deliver results!

- ✓ Supports healthy blood pressure
- ✓ Supports cardiovascular and heart health
- ✓ May support respiratory health through Nitric Oxide production
- ✓ Promotes increases circulation

N-O Indicator Strips:

Nitric Oxide Indicator Strips capture a simple, and non-invasive, saliva sample to determine the concentration of a salivary nitrite, a key biomarker, needed for the production and availability of Nitric Oxide.

Dosage for Neo40 Nitric Oxide Tablet:

One Neo40 tablet in the morning and one Neo40 tablet about 2 hours before bed. Works best when taken on an empty stomach. (One hour before eating or two hours after eating is a good rule of thumb.) To avoid mouth sensitivity, move the tablet around in the mouth and/or hydrate with water prior to using.

Dosage for BeetElite Powder:

1-2 scoops of the powder with 4-6 ounces water. Mix and take quickly like a shot; do not sip. Do not make ahead and save for later. Do not mix into a smoothie or other drink. Take 30 to 60 minutes before workout or midday.
