### Marine Collagen & Hydrolysis

Shore Magic® collagen is **95% bioavailable**, making it the most easily absorbed collagen on the market.

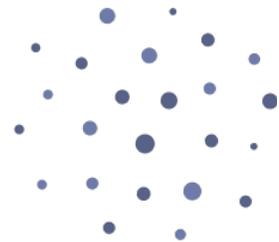

Other lower-quality collagen supplements typically have 5% bioavailability or less.

Shore Magic® Hydrolyzed Marine Collagen is the most compatible with human tissue, which is why the results are so remarkable.

Hydrolysis is the process of breaking down collagen protein into smaller, individual peptides.

Shore Magic® Collagen  
15x smaller than average

Hydrolyzed collagen has been shown to play a significant therapeutic role in human health and disease. A study on the supplement showed significant reductions in skin dryness and wrinkles and a significant increase in collagen density and skin firmness.

According to studies, collagen peptides, or short-chain amino acids, derived from fish skins, has greater efficacy and absorption.

Shore Magic® has a lower molecular weight than other collagen formulations. This allows the collagen to be absorbed at a higher level through the intestinal barrier into the bloodstream and carried throughout the body.
