

## Vollara Air & Surface Purifier

Featuring an ***ozone*** option that is highly effective against contaminants and pollutants found in the air and on surfaces.

Now with ActivePure® technology, the shared air can be purified in real time, just like it happens in *nature*.

### Vollara® Air & Surface Pro+

The Vollara® Air & Surface Pro+ combines multiple complementary technologies, including HEPA, activated carbon, and ActivePure® Technology. Patented ActivePure® is an advanced surface and air purification technology. It has been proven to reduce over 99.9% of many common airborne and surface contaminants.

#### FEATURES:

- ✓ Portable, lightweight device
- ✓ No installation - plug-and-play solution
- ✓ Easy to use and low maintenance
- ✓ Reduces dirt and dust from the air
- ✓ Proven effective against many common viruses, bacteria, molds, and fungi
- ✓ Reduces smoke, allergens, odors, and VOCs
- ✓ The air smells like nature... clean and fresh!

## HOW IT WORKS:

### Vollara® Air & Surface Pro+ with ActivePure® Technology

ActivePure® technology is used in hospitals and other shared facilities across the world and is proven by science and validated by multiple third parties.

ActivePure® is a patented advanced photo catalysis technology. It works by creating and propelling molecules into the air in a room, which quickly neutralize pathogens everywhere.

ActivePure® molecules work by destabilizing the shell of a virus, bacteria, or other microscopic contaminant to destroy its living environment, turning it into harmless byproducts.

These odorless and invisible ActivePure® molecules fly through the air, neutralizing pathogens in the air you breathe and on the surfaces you touch.

**Gain peace of mind; know that you are providing an important layer of protection for your indoor spaces.**

## SPACE TECHNOLOGY HALL OF FAME

In 2017, ActivePure® Technology was inducted into the **Space Technology Hall of Fame**, a Space Foundation program aiming to increase public awareness of the benefits of space exploration and encouraging further innovation of NASA-adapted technologies to improve the quality of life for humanity.
