

Gut Infection Probiotic Support

Gut Infection (SIBO AND C diff) Probiotic Support

Take 1 RestorFlora + 1 HU58 with breakfast

Take 2 MegaSporeBiotic™ with lunch

Take 1 Restorflora + 1 HU58 with dinner

In Addition: Take MegaMucosa and MegaPre daily, following the instructions on each product's label.

Take RestorFlora when experiencing a gut infection to help crowd out pathogens and restore balance of your gut microbiome. The S. boulardii in RestorFlora prevents Candida (yeast) overgrowth.

The addition of HU58 when experiencing a gut infection provides an extra boost to restore a healthy balance of intestinal microflora. HU58 is a single-strain probiotic with a concentrated dose of Bacillus subtilis, which can produce 20+ different by-products that are anti-microbial. B. subtilis has the ability to do this intelligently and when needed by using what is called quorum sensing (this is how they communicate with each other) to identify pathogens, so they know what and where the antimicrobials should go.

RestorFlora™

RestorFlora is a probiotic supplement that combines well-studied and widely-used probiotic strains Saccharomyces Boulardii, Bacillus Subtilis HU58, and Bacillus Clausii. This combination of probiotic yeast and bacteria offers comprehensive digestive flora support with an advanced, dual-action approach to maintain a healthy intestinal environment.

MegaSporeBiotic™

MegaSporeBiotic™ is a 100% spore-based, broad-spectrum probiotic clinically shown to maintain healthy gut barrier function. This unique all-spore formula effectively RECONDITIONS the gut by promoting microbial diversity and maintaining key health-promoting, commensal gut bacteria.

HU58™

HU58™ is a single-strain probiotic with a concentrated dose of *Bacillus subtilis* HU58, formulated to support healthy immune function and maintain a healthy balance of intestinal microflora.

MegaMucosa

MegaMucosa is the first complete mucosal support supplement of its kind, formulated to REBUILD a healthy mucosal barrier.

Start with 3 capsules daily with or without a meal for one week, then increase to 6 capsules daily with or without a meal as tolerated.

MegaPre™ Prebiotic

MegaPre™ is the first Precision Prebiotic™ supplement made up of non-digestible oligosaccharides that can increase microbial diversity and selectively feed beneficial bacteria like Akkermansia muciniphila, Faecalibacterium prausnitzii, and Bifidobacteria. MegaPre™ REINFORCES the beneficial microbial changes created by MegaSporeBiotic™ to promote a strong and diverse microbiome.

Start with 3 capsules daily with or without a meal for one week, then increase to 6 capsules daily with or without a meal as tolerated.
