

Zeolite the "Detox Magnet"

What is Zeolite and How does it Work?

Zeolite is a naturally occurring mineral that contains a very strong "cage-like" structure and negative charge.

There are many types of naturally occurring zeolites. Due to its strong negative charge, zeolite is attracted to positively charged elements which it collects in its cage-like structure.

Many toxic elements – mercury, lead, cesium, ammonia, mycotoxins and many environmental toxicants – are positively charged.

Zeolite, with its negative charge, is pulled to the positively charged toxins, like a magnet.

These toxic substances become trapped in zeolite's cage structure, and are then safely and gently carried out of the body.

Zeolite acts as a strong "detox magnet" in your body with the unique ability to selectively remove toxic elements while leaving essential minerals, vitamins and nutrients alone.

Instead of just grabbing everything it comes across, zeolite works by selectively binding toxic elements through a process we call "swap and drop." Zeolite's unique ability to selectively detox is what makes it a "smart binder" and such an incredible detox product.

ZeoCharge™ Has Proven To:

- Reduce Tissue Levels of 15 Toxic Metals
- Help Balance Essential Minerals
- Increase Tissue Vitamin Saturation
- Offer a Gentle Detox Experience

What can Zeolite Bind To?

Heavy Metals:

Zeolite traps toxic metals like mercury, lead, cadmium, and arsenic, removing them safely and alleviating symptoms like chronic fatigue and brain fog.

Environmental Toxicants:

Zeolite binds to toxic elements from air, food, and water, reducing health issues like fatigue, brain fog, and weakened immunity.

Mycotoxins:

Zeolite binds to mold toxins (mycotoxins) like Aflatoxins and Ochratoxin A, reducing chronic inflammation and hypersensitivity.

Microbial Toxins:

Zeolite helps bind microbial toxins, reducing inflammation and symptoms of conditions like Lyme Disease.

Metabolic Waste:

Zeolite binds to toxic metabolic byproducts like ammonia and urea, aiding in their removal from the body.

Histamine:

Zeolite binds to excess histamine, reducing symptoms like hives, itching, and headaches, and helping with seasonal allergies.

Radioactive Particles:

Zeolite (clinoptilolite) binds to radioactive isotopes like cesium-137 and strontium-90, aiding in decontamination efforts.

Zeolite Benefits

Antioxidant Support:

Zeolite traps free radicals, reduces their formation, and boosts the body's antioxidant capacity, combating oxidative stress and cell damage.

pH Balance:

Zeolite, an alkaline mineral, regulates pH directly and promotes healthy pH by removing toxins that disrupt the body's natural balance.

Reduced Inflammation:

Zeolite helps regulate inflammation by removing toxins that cause excess inflammation.

Increased Energy:

By removing toxins, zeolite reduces the body's workload, resulting in increased energy.

Immune Support:

Zeolite eases the burden on the immune system by eliminating toxic elements, allowing the body to recover.

Weight Loss:

Zeolite aids in weight loss by removing toxins stored in fat, allowing the body to burn fat more effectively.

Reduce Brain Fog:

Zeolite improves mental clarity and alertness by removing toxins that cause brain fog.

Repair Leaky Gut:

Zeolite helps alleviate leaky gut symptoms by removing toxins that damage the gut lining and by regulating immune and inflammatory responses.

Optimize Nutritional Intake:

Zeolite optimizes mineral levels by removing heavy metals that compete with essential minerals and reduces stress, helping the body use vitamins and nutrients more efficiently.
