

Antibiotic Support

Antibiotic Support*

Take 1 RestorFlora + 1 HU58 with breakfast

Take 2 MegaSporeBiotic™ with lunch

Take 1 Restorflora + 1 HU58 with dinner

** Use during antibiotic treatment and for three weeks following*

Take Restorflora during antibiotic use to help crowd out pathogens and restore balance of your gut microbiome. The *S. boulardii* in Restorflora prevents Candida (yeast) overgrowth.

The addition of HU58 during antibiotic use for an extra boost to restore a healthy balance of intestinal microflora. HU58 is a single-strain probiotic with a concentrated dose of *Bacillus subtilis*, which can produce 20+ different by-products that are anti-microbial. *B. subtilis* has the ability to do this intelligently and when needed by using what is called quorum sensing (this is how they communicate with each other) to identify pathogens, so they know what and where the antimicrobials should go.

RestorFlora™

RestorFlora is a probiotic supplement that combines well-studied and widely-used probiotic strains *Saccharomyces Boulardii*, *Bacillus Subtilis* HU58, and *Bacillus Clausii*. This combination of probiotic yeast and bacteria offers comprehensive digestive flora support with an advanced, dual-action approach to maintain a healthy intestinal environment.

MegaSporeBiotic™

MegaSporeBiotic™ is a 100% spore-based, broad-spectrum probiotic clinically shown to maintain healthy gut barrier function. This unique all-spore formula effectively RECONDITIONS the gut by promoting microbial diversity and maintaining key health-promoting, commensal gut bacteria.

HU58™

HU58™ is a single-strain probiotic with a concentrated dose of *Bacillus subtilis* HU58, formulated to support healthy immune function and maintain a healthy balance of intestinal microflora.
